PROFESSIONAL SUMMARY

Data Analyst with 2 years of hands-on experience (including an internship) in SQL analytics, BI dashboards and reporting automation, backed by 7+ years in IT. Day-to-day work covers data marts, ETL and dashboards in DataLens, Power BI and Visiology. One query rewrite cut a client's financial report runtime from 2 minutes to 3 seconds, and a manual weekly report became an automated dashboard. Projects span retail clients and internship analytics on marketplace, pharmacy and EdTech data. Mentoring students on Data Analyst course projects alongside. Open to relocation (EU, Serbia) and remote roles.

CORE COMPETENCIES

Analytics: SQL (window functions, query optimization) · Data Mart Design · ETL · Reporting Automation · Dashboard Development · Data Visualization · Exploratory Data Analysis · ABC/XYZ Analysis · Product Metrics (MAU/WAU/DAU, Retention) · Data Validation & Reconciliation · Microsoft Excel

BI & Visualization: Yandex DataLens · Power BI (DAX) · Oracle BI · Visiology · Metabase · Apache Superset

Databases & Data Engineering: ClickHouse · PostgreSQL · Oracle DB · Oracle SQL · MySQL · 1C Data Exports · Apache Airflow (basic)

Programming & ML: Python (NumPy, Matplotlib, scikit-learn) · Git · Machine Learning fundamentals (coursework)

WORK EXPERIENCE

Simulative

May 2026 – Present

Mentor, Data Analyst Course (part-time)

Online school for analytics · SQL, ClickHouse, PostgreSQL, Python, Git, data visualization

- Review final projects of Data Analyst course students (19 projects to date), checking the analysis and its presentation of results.
- Give detailed written feedback on what to correct and how to make the results clearer and more convincing.
- Draw on 8+ years of teaching experience to explain analytical concepts in plain language.
- Took part as an invited guest in webinars.

Excite Kit

Jun 2026 – Sep 2026

Data Analyst (fixed-term contract)

Analytics migration project for a large enterprise client (under NDA) · Team of 5 · Remote

- Took over 50+ business reports from a legacy BI platform and broke down the SQL logic behind each one to understand how every report is calculated.
- Rewrote the SQL for the new analytical database dialect and checked results against the legacy reports, reporting any discrepancies to the data-migration team, which handled the data transfer.
- Worked out which reports could share the same data, then designed and built consolidated data marts for them.
- Rebuilt all 50+ reports as dashboards with the required filters, with the numbers reconciling against the legacy system.
- Handed the completed work over to the client through the project manager.

Denvic Analytics

Jul 2025 – Jun 2026

BI Analyst

Analytics company delivering BI projects for clients · 200 employees · Project teams of 2–3 · Remote

- Rewrote a slow financial report query for a client by fixing JOIN bottlenecks and adding window functions and indexes, which cut execution time from 2 minutes to 3 seconds and eliminated failures at peak load.
- Replaced manual weekly report assembly for a major client (Excel files and 1C exports, 3–4 hours each week, about 16 hours per month) by loading 1C and file data into ClickHouse, building a shared data mart and SQL metrics, and publishing a dashboard that recalculates by filter in 10–15 seconds.
- A purchase-forecasting dashboard with parameters and seasonality, built for a flower retail chain, cut planning time from 1 day to 30 minutes and removed manual consolidation errors.

- Reworked a live HR dashboard for a large international electronics retail chain without disrupting its use, gathering requirements, reconciling metric calculations with the client's internal figures in regular calls, and adding year-over-year comparisons and category filters. The dashboard made turnover trends visible and supported retention of key employees (hiring savings of about 8% of the annual HR budget). Also closed a project iteration that had stalled before joining.
- Created a sales dashboard in Visiology for the internal sales team, including the ETL process and a dedicated data mart.
- Redesigned the company's sales demo dashboard in DataLens used for client acquisition, which increased leads by 15%.

IT Resume
Sep 2024 – Jul 2025

Data Analyst (Internship, part-time)

Analytics internship on real client data · Remote

- Built a receipt-processing pipeline (Excel files from 1C to PostgreSQL) and a KPI dashboard in Metabase.
- Calculated MAU/WAU/DAU and retention for an EdTech portal, analyzed the link between user activity and academic performance, and analyzed transactions and internal balances to identify factors behind deposits and withdrawals.
- Set up ETL from the portal's API into PostgreSQL, with DataLens dashboards and dynamic filters on top.
- Ran exploratory sales analysis for a marketplace (seasonal patterns, top categories) and ABC/XYZ analysis of a pharmacy chain's assortment (non-moving items).
- Developed ETL processes for B2B client sales data and built Power BI dashboards for retail-network performance.

Lomonosovsky District Court, Arkhangelsk
Mar 2019 – Jul 2025

System Administrator

- Developed and optimized 50+ complex SQL queries (Oracle SQL, MySQL, FirebirdSQL) for ad-hoc reporting for court departments.
- Administered IT infrastructure (Windows Server, Active Directory, Group Policy, backups) and prepared quarterly and annual reports on court informatization.

GeekBrains
Aug 2022 – Nov 2023

Expert Instructor

- Taught system administration (Windows Server, PowerShell, WMI), ran webinars and consultations, and reviewed Data Science homework (NumPy, Matplotlib, scikit-learn).

EDUCATION

Northern (Arctic) Federal University named after M.V. Lomonosov, Arkhangelsk 2010 – 2012

Master's Degree, Applied Mathematics and Computer Science

Pomor State University named after M.V. Lomonosov, Arkhangelsk 2005 – 2010

Specialist Degree, Mathematics with additional specialization in Computer Science

CERTIFICATIONS & COURSES

- Yandex Cloud Certified DataLens Analyst, Yandex Cloud, 2025 (valid until Sep 2027), Credential ID: YDLCA0313854
- Data Engineer (Professional Retraining Diploma), Simulative, 2026
- Machine Learning Engineer, Simulative, 2026 (course completed, diploma pending)
- BI Analyst (Professional Retraining Diploma), Simulative, 2025
- Data Analyst (Professional Retraining Diploma), Simulative, 2025

ADDITIONAL

- Portfolio and GitHub: educational data science and data engineering projects, including an Airflow pipeline built during the Data Engineer course.
- Author of the Telegram channel t.me/nullpp on SQL and the hh.ru job market for data analysts.
- 8+ years of teaching experience, including IT subjects.
