Summary

Data Analyst with 2 years of hands-on experience and a strong IT background of 7.5+ years. I manage the end-to-end data lifecycle, including advanced SQL querying, data mart design, ETL pipeline development (Airflow, Python), and interactive dashboarding (Power BI, DataLens, Metabase, Superset). My core focus is on reporting automation and enabling data-driven decision-making across business functions. Growing into ML and looking to bring analytics and machine learning together for predictive solutions.

Work Experience

Excite Kit 06.2026 — 09.2026
Middle Data Analyst (fixed-term) 4 months
· [SQL](#) · [ClickHouse](#) · [PostgreSQL](#) · [DataLens](#) · [Power BI](#) · [DAX](#) · [Python](#) · [A/B-testing](#) ·

Participated in project for import substitution of analytics for a large retail chain: designed and launched dashboards in DataLens for transaction monitoring, fraud detection, and loyalty performance tracking. Migrated over 50 reports with no loss of functionality, automated data mart refreshes, and loyalty visualizations helped marketing reallocate budget toward the most profitable customer segments.

Simulative Mentor 05.2026 — present

· [SQL](#) · [ClickHouse](#) · [PostgreSQL](#) · [Data visualization](#) · [Python](#) · [Git](#) ·

I consult students on a wide range of academic issues. I specialize in reviewing thesis papers: I help refine a thesis to meet high academic standard.

Denvik Analytics 07.2025 — 06.2026
BI Analyst 12 months
· [SQL](#) · [ClickHouse](#) · [PostgreSQL](#) · [Visiology](#) · [DataLens](#) · [1C](#) · [Power BI](#) · [DAX](#) · [Python](#) · [DVT](#) · [Git](#) ·

Company demo dashboard (DataLens): *redesigned the visualization of the sales department's demo dashboard for client acquisition → leads increased by 15%.*

Sales dashboard (Visiology): *built an ETL process, created a data mart, and made sales analytics clear and understandable for the entire team.*

Report automation for a major client: *replaced a manual 2-day data collection process with a data mart using window functions → time savings of ~16 hours per month.*

Purchase forecasting for a client: *created a dashboard with parametrization and seasonality → reduced planning time from 1 day to 30 minutes, eliminated manual consolidation errors.*

Financial report optimization for a client: *optimized the SQL query (identified bottlenecks in JOINS, added window functions + indexes) → execution time dropped from 2 minutes to 3 seconds, peak-time failures eliminated.*

HR dashboard for a large retail chain: *added year-over-year comparisons and category filters → enabled identification of turnover trends, which influenced retention of key employees (savings on hiring ~8% of the annual HR budget).*

Simulative Data Analyst (Internship, part-time) 09.2024 — 07.2025
11 months
· [SQL](#) · [PostgreSQL](#) · [ClickHouse](#) · [Python](#) · [Power BI](#) · [DAX](#) · [Metabase](#) · [Superset](#) · [Product Analytics](#) · [Git](#) ·

Marketplace and retail analytics:

· *Conducted exploratory sales analysis for a marketplace → identified seasonal patterns and top categories for promotion.*

- Performed ABC/XYZ analysis of a pharmacy chain's product assortment → identified non-moving items and optimized inventory.
- Built a pipeline for receipt processing (Excel files from 1C → PostgreSQL) and a KPI dashboard in Metabase.

EdTech analytics (educational portal):

- Calculated MAU/WAU/DAU and retention, identified correlation between activity and academic performance → helped the product team improve retention in a targeted manner.
- Analyzed transactions and internal user balances → identified factors affecting deposits and withdrawals.
- Create ETL (site API → PostgreSQL) and dashboards in DataLens with dynamic filters.

Corporate analytics:

- Developed ETL processes for processing B2B client sales data.
- Built dashboards in Power BI for analyzing retail network performance.

District Court	03.2019 — 07.2025
System Administrator	6 years 5 months
· SQL · Oracle SQL · MySQL · FirebirdSQL ·	

Developed and optimized 50+ complex SQL queries for ad-hoc departmental reporting. Administered IT infrastructure: Windows Server, Active Directory, Group Policy, backup management (software, scripts). Prepared quarterly and annual reporting on court informatization.

GeekBrains	08.2022 — 11.2023
Expert	1 year 4 months
· Data science · Scikit-Learn · Matplotlib · Python · Numpy · Windows Server Management ·	

Taught system administration (Windows Server, PowerShell, WMI), conducted webinars and consultations. As part of expert review of Data Science homework assignments, evaluated work on NumPy, Matplotlib, Scikit-learn, which confirms deep proficiency in the Python stack for data analysis.

Education

Graduated

Northern (Arctic) Federal University named M.V. Lomonosov, Arkhangelsk	2013 — 2016
Geometry and Topology (Postgraduate Studies)	
Northern (Arctic) Federal University named M.V. Lomonosov, Arkhangelsk	2010 — 2012
Applied Mathematics and Computer Science (Master's Degree)	
Pomor State University named M.V. Lomonosov, Arkhangelsk	2005 — 2010
Mathematics with a specialization in Computer Science (Specialist)
